

Company Overview

RVM provides holistic legal technology consulting, data forensics and litigation support services. RVM's team of experts, including industry savvy consultants, top-flight project managers and seasoned support personnel can assist you with your most demanding discovery and e-data processing assignments. RVM's proprietary e-data processing software, Revelation™, delivers consistent, repeatable, and defensible results on time and under budget.

RVM has been providing exceptional service and results to legal and corporate clients since 1996. With offices in New York's financial district, inside the Loop in Chicago, and redundant 100Mb / sec connectivity to our datacenter, RVM is virtually right around the corner.

Company Capability

Client Benefit

RVM develops long-term relationships with clients	Work with professionals who understand and service your needs seamlessly throughout the project, this time and every time
RVM offers a complete range of discovery and litigation support services	Avoid the complexity, cost, and risk managing multiple vendors for a single project
RVM enforces rigorous quality control standards	Don't waste time and money encountering needless errors. High-quality deliverables pay for themselves
RVM takes its responsibility seriously	Enjoy responsive, on-time, cost-effective service and delivery

RVM provides holistic legal technology consulting & support services.

Don't fall in the litigation support trap. Let RVM help today by:

- Planning and preparing your organization's data systems and processes for litigation
- Gathering, organizing and presenting the relevant data to facilitate an early case assessment
- Processing, filtering and producing all of your data completely, on time and under budget

In a world of sanctions and exponential data growth, choosing the right team can make the difference between winning and winding up on the cover of the Wall Street Journal.

RVM's strategic services target those that recognize the threat of litigation and the consequences of not being "Litigation Ready." RVM's teams of industry experts will examine your organization's data infrastructure and help define the most cost effective and efficient solution.

RVM's tactical services analyze specific conditions to ensure that your organization is making complete and accurate statements throughout the entire process. From prepping for the "Meet & Confer" to validating your organization's legal hold procedure, RVM's experts will help bridge the communications gap between legal and IT.

RVM's responsive services streamline the complex and often overwhelming data management requirements in today's litigation. From investigations, forensic collection and data reconstruction to de-duplication, filtering and keyword search, RVM's team of investigators, project managers and support staff have seen it all.
