***RVM Expands Operations to Europe***

**NEW YORK, February 1, 2016** – RVM Enterprises, Inc., a leader in the eDiscovery industry, announced the establishment of its European operations. The expansion addresses the concerns of RVM’s global clients and their need to remain in strict compliance with EU complex data protection and privacy laws.

RVM has chosen to establish Data Center footprints in both Northern and Western Europe. The data center locations provide RVM with appropriate coverage, security, and redundancy within the region to continue to support its clients needs.

“I am proud and thrilled to be able to announce our expansion into the European Union,” said [Vinnie Brunetti, CEO of RVM Enterprises, Inc.](#) “RVM is building on a 20 year foundation of deep experience, providing litigation solutions in areas such as eDiscovery and data management, as well as information governance. Our clients conduct business around the world and we have listened to what they have to say. I’m confident we will be able to help our clients navigate the challenging waters of EU data privacy and security.”

RVM has a reputation for innovation in the eDiscovery industry, and is looking forward to a broader global presence. Expansion is not new to RVM. In 2015, RVM opened a state-of-the-art facility in Los Angeles and expanded its Managed Review Center in Cleveland. By opening the EU data centers, RVM will continue to bring its deep understanding of all facets of eDiscovery and extensive consulting services to the European Union.
